

The logo features a stylized folder icon with a rainbow gradient. The folder is divided into vertical sections of red, orange, yellow, and gold. To the left and right of the folder are horizontal lines in red, pink, blue, green, and yellow, which appear to be part of a larger graphic element.

Rainbow Folders

QUICK START

Introduction

Have you ever thought about highlighting often used project folders? This simple but colorful asset allows you to do that!

With "Rainbow Folders" you can set custom icon for any folder in unity project browser:

Configuring folder icons

From the main menu select **Edit -> Rainbow Folders Settings**, then take a look at the Inspector.

There is reorderable list with few predefined "folder" items. You can modify existing items, remove them using "-" button or add new ones by clicking "+" button below.

What you need to configure for each folder item, are these fields:

- **Folder Name** - name of the folder you want to change the icon for.
Icon will be applied to all folders with this name.
- or **Folder Path** - icon will be applied to a single folder with specified path.
The path format: "Assets/SomeFolder/YourFolder"
- **Small Icon** - custom icon for the left panel of the project browser (16x16 px)
- **Large Icon** - custom icon for the right panel of the project browser (64x64 px)

Your changes will be applied next time when the project browser will retrieve focus.

Quick Colorize & Tag

You can also quickly colorize or tag folders from context menu. To do so, right click on the folder in project browser, then select **Rainbow Folders -> Colorize -> Color** or **Rainbow Folders -> Colorize -> Tag**. Changes will be applied immediately.

To reset the folder icon to default one, select **Rainbow Folders -> Colorize -> Revert to Default** from the same context menu.
